

A black and white photograph of two industrial workers in safety gear (hard hats, high-visibility vests) working on large, complex machinery. The machinery features large cylindrical components, pipes, and a motor. The workers are positioned in the lower-left area of the frame, looking at a device. The background shows more industrial equipment and a metal grate floor.

# SAFETY INTERACTIONS TRAINING

At Core Crew Training, we believe safety interactions should go beyond compliance—they should foster real engagement, stronger workplace culture, and lasting behavioural change. Too often, safety conversations become routine check-ins or system-driven tasks rather than meaningful discussions that drive safer behaviours. By shifting the focus from ticking boxes to genuine engagement, we help organisations cultivate inclusive, committed, and proactive safety cultures.

## OUR SERVICE

Our Safety Interactions Training is a practical, one day mentoring session which covers:

### Effective Safety Conversations

Learn how to engage in meaningful discussions that drive real safety improvements. Gain practical techniques to ask the right questions, actively listen, and address safety concerns in a way that encourages real change.

### Behavioural Safety Leadership

Develop the skills to influence and reinforce safe behaviours across your team. Understand how to reinforce safe practices, provide constructive feedback, and foster a proactive approach to hazard identification and risk management.

### Building a Safety-First Culture

Strengthen team trust, accountability, and commitment to workplace safety. Learn strategies to create an environment where safety interactions are seen as valuable opportunities for growth and improvement.

## OUR APPROACH

### Practical and hands-on

We go beyond theory with real-world scenarios, mentoring, and interactive exercises to ensure participants apply their learning immediately.

### Tailored Approach

Our training is designed for supervisors, safety professionals, and frontline managers looking to enhance safety culture, improve communication, and foster proactive safety leadership.

### Sustainable Outcomes

Our programs provide your team with the knowledge and skills to foster ongoing safety interaction improvements.

**Our team at Core Crew Training has a wide variety of services to meet your specific training needs**

## Leadership Development Training

Developing leaders at every level, from frontline supervisors to executives, through tailored, research-driven programs that foster accountability, collaboration, and effective leadership.

## Training Audits and Solutions

Partnering with us through a Third-Party Agreement gives your business the expertise of a Registered Training Organisation (RTO). We handle compliance, admin, and certifications so you can focus on empowering your team to excel.

## Practical Training & Certification Pathways

We deliver a wide range of accredited and non-accredited training programs designed specifically for the mining and heavy industry sectors.

## SkillStart

Drawing from our extensive experience in heavy industry, we've developed a ground-breaking 'new to industry' program, aimed at addressing the industry's pressing need for skilled workers.
